Education

University of Central Florida Expected 2027

B.S. Mathematics

Coursework: Mathematical Foundations of AI & Machine Learning; Optimization Theory & Mathematical Modeling; Linear Algebra.

Projects

Ultralearn / Stateful AI tutoring In development

- Building a stateful tutor that uses knowledge graphs across domains, starting with SAT math.
- Creating math content through an AI content pipeline for @ultralearns.

Hacky / AI matchmaking ~32 hours · Knight Hacks IX

- Directed agents to build the prototype, React UI, and conversational onboarding.
- Shaped a focused matching experience with a custom knit mascot and polished interactions.

Étude / Adaptive piano tutor ~44 hours · Gator Hack V finalist

- Owned the entire learning architecture: 207-skill graph, mastery model, and spaced review.
- Built a planner grounded in learner state, with runtime validation and deterministic fallback.

Donna / Campus connections On the App Store

- Build UI and backend logic on the founding development team of a UCF social app.
- Lead the agent-first refactor, giving coding agents useful tools and relevant context.

How I Build

seeko-stack - My Firstmate-based toolkit for coordinating parallel coding agents, preserving context, and checking changes before they ship.

Work & Teaching

A3 Tutors Visit website Founder & Tutor · 2024–present

I coach and tutor students for the SAT, helping them qualify for Bright Futures scholarships.

Hackathon times are elapsed repository windows for three-person teams, rounded. github.com/seeko-codes
